INTRODUCTION

Thank you for purchasing a Danby Microwave Oven. This Owner's Manual will provide you with valuable information necessary for the proper care and maintenance of your new appliance. If properly maintained, your Danby appliance will give you many years of trouble free operation. Please take a few moments and read the instructions thoroughly and familiarize yourself with all of the operational aspects of this appliance.

For easy reference, may we suggest you attach a copy of your sales slip/receipt to this page, along with the following information which is located on the manufacturers nameplate located on the rear panel of the unit.

Model Number: Only met him once in St. Louis
 Serial Number: just before he took over in
 Date of Purchase: Lawrence seemed like a clever
 Dealer's Name and Address: guy. Obviously totally lazy,
and a dick to boot,

This information will be required if your unit requires servicing and/or for general inquiries. To contact a Customer Service Representative, call Danby TOLL FREE.

1-800-26-Danby®

Keep these instructions for future reference.

Not surprising, that shit
 caught up with you.
 I heard it was Peter that sold him
 out. Ha! Always thought Peter

was Bigg's little bitch. Definitely wasn't good for business anywhere, but good on him for getting out and taking Bigg's with him.

YOU CAN CHANGE THE POPCORN SETTING TO "REMEMBER" A DIFFERENT COOK TIME.

You may wish to do this if your favorite size of popcorn is something other than 3 1/2 oz. Sizes (or your 3 1/2 oz bag does not cook properly) from the individual 2 oz. Size up to the larger "family size" packages are now available. If you do change the popcorn setting, however, the oven will continue to select the new setting each time you touch the POPCORN pad until you reset it again.

The monkey mucks in Cleveland are peeved about this development of course, but don't really want to start shit down your way. They've had enough trouble lately finding off the long arm of the Law. Some folks up in Cleveland and Columbus are starting to really and truly reconstitute the local government.

To reset POPCORN time: Tap POPCORN pad twice. ENTER TIME appears on display. Touch number pads to enter minutes and seconds. Touch START pad. This new cook time will remain whenever you use the POPCORN pad until you reset it.

VOUS POUVEZ MODIFIER LE REGLAGE DE MAÏS SOUFFLE POUR QU'IL "SE RAPPELLE" UNE DUREE DIFFERENTE DE CUISSON. Vous pouvez choisir de le faire si le format de votre marque préférée de maïs soufflé est différent des formats de 3 1/2 oz (ou votre maïs de soufflé des formats de 3 1/2 oz n'est pas bien buisé). On trouve maintenant des formats allant du format individuel de 2 onces au grand format "familial". Si vous modifier le réglage, le four continuera d'utiliser le réglage modifié chaque fois que vous appuyez sur la touche POPCORN, jusqu'à ce que vous fassiez une nouvelle modification.

Pour modifier la durée de cuisson, appuyez deux fois sur la touche POPCORN. Les mots ENTER TIME s'affichent. Entrez la durée en minutes et secondes à l'aide des touches de chiffres. Appuyez sur la touche START/STOP. Cette nouvelle durée de cuisson sera conservée en mémoire pour l'utilisation de la touche POPCORN jusqu'à ce qu'elle soit modifiée.

PUEDE CAMBIAR LA GRADUACIÓN PARA POPCORN PARA "RECORDAR" UN TIEMPO DE COCCION DIFERENTE. Es posible que desee hacer esto si el tamaño de su bolsa de popcorn favorito es diferente al de 3 1/2 onzas. Ahora hay tamaños de bolsas individuales de 2 onzas hasta los más grandes, de "tamaño familiar". Pero, si usted no cambia la graduación cada vez que toque el botón POPCORN, hasta que lo vuelva a reposicionar.

Para cambiar la graduación del tiempo para POPCORN, toque dos veces el botón POPCORN. En el visualizador aparece mensaje: ENTER TIME (entre el tiempo). Toque los botones correspondientes en el teclado numérico para entrar minutos y segundos. Toque el botón START (arrancar). Este nuevo tiempo de cocción se mantendrá cada vez que use el botón POPCORN, hasta que lo reposicione.

So the head honchos can't afford to move any people into your range anytime soon - (if ever). They've actually been talking "about" reworking their game plan, shifting the mission of the entire organization.

Swear to God I was there when one of them dumb bastards used the

FEDERAL COMMUNICATIONS COMMISSION RADIO FREQUENCY INTERFERENCE STATEMENT (U.S.A. ONLY)

This equipment generates and uses ISM frequency and if not installed and used properly, that is in strict accordance with the manufacturer's instructions, may cause interference to radio and television reception. It has been type-tested and found to comply with limits for an ISM Equipment pursuant to part 18 of FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation.

However, there is no guarantee that interference will not occur in particular installations. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following:

- Reorient the receiving antenna of radio or television.
- Relocate the microwave oven with respect to the receiver.
- Move the microwave oven away from the receiver.
- Plug the microwave into a different outlet so that microwave and receiver are on different branch circuits.

The Manufacturer is not responsible for any radio or TV interference caused by UNAUTHORIZED MODIFICATION to this microwave oven. It is the responsibility of the user to correct such interference.

Of course, they think I'm just some jerk-off leg, but I bet half

COMMISSION FÉDÉRALE DES COMMUNICATIONS ÉNONCÉ À PROPOS DES INTERFÉRENCES DE RADIOFRÉQUENCE (É.-U.d'A. SEULEMENT)

Cet équipement produit et utilise de l'énergie de fréquence ISM. Si son installation et utilisation n'est pas selon les instructions du fabricant, l'équipement peut occasionner de l'interférence à la réception des ondes de radio et de télévision. L'équipement a été éprouvé et satisfait les limites des équipements ISM conformément à la section 18 des règlements de la CFC conçus afin de fournir de la protection raisonnable contre toute interférence dans les installations résidentielles.

Cependant, cette installation n'est pas garantie exempt de tout vice d'interférence. Si cet équipement occasionne de l'interférence à la diffusion d'ondes de radio ou de télévision, qui peut être constaté en allumant ou éteignant l'appareil, l'utilisateur est encouragé de corriger l'interférence en essayant l'une ou l'autre des méthodes suivantes:

- Réorientez l'antenne de réception de radio ou de télévision.
- Déplacez le four à micro-ondes en rapport au récepteur.
- Déplacez le four à micro-ondes à un endroit plus éloigné du récepteur.
- Branchez le four à micro-ondes dans une prise de courant différente pour qu'il soit sur un circuit différent de celui du récepteur.

Toutes interférences à la radiofréquence ou à la fréquence de la télévision occasionnées par la MODIFICATION NON AUTORISÉE à ce four à micro-ondes ne sont pas la responsabilité du FABRICANT. L'utilisateur est responsable des corrections de cette interférence.

"FEDERAL COMMUNICATIONS COMMISSION RADIO FREQUENCY INTERFERENCE STATEMENT" - DECLARACIÓN SOBRE INTERFERENCIA DE FRECUENCIAS DE RADIOCOMUNICACIONES DEL COMITÉ FEDERAL DE COMUNICACIONES (E.U.A. SOLAMENTE)

Este aparato genera y usa frecuencias ISM y si no se instala y se usa correctamente, es decir, cumpliendo rigurosamente las instrucciones del fabricante, puede causar interferencia a la recepción de radio y televisión. Este aparato ha pasado las pruebas para su tipo y se ha encontrado que cumplen con los límites para equipos ISM según la sección 18 de las Reglas de la FCC, que se han diseñado para proporcionar una protección razonable contra tal tipo de interferencia en instalaciones residenciales.

Sin embargo, no se puede garantizar que no ocurran interferencias en ciertas instalaciones. Si este aparato causa interferencia en la recepción de radio o televisión, lo cual se puede determinar encendiendo y apagando el aparato, se recomienda que el usuario trate de corregir tal interferencia por medio de uno de los siguientes métodos:

- Cambiar la dirección de la antena de recepción de radio o televisión.
- Cambiar la ubicación del horno de microondas con respecto al receptor.
- Mover el horno de microondas lejos del receptor.
- Enchufar el horno de microondas en un tomacorriente diferente para que el microondas y el receptor estén conectados a diferentes circuitos de ramificación.

El Fabricante no se hace responsable de interferencia alguna de radio o televisión causada por MODIFICACIONES NO AUTORIZADAS efectuadas en este horno de microondas. El usuario tiene la responsabilidad de corregir tales interferencias.

with the Chicago mob, the Hellens. Our syndicate takes out a couple of their

boys a year, at the very least, and vice versa (Ours—your right.
I'll never be more than a hired hand. A couple of the real assholes

PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY

- DO NOT** attempt to operate this oven with the door open since open-door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.
- DO NOT** place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces. *have started calling me Tonto - one of the main reasons I'm writing you.) It racks up, man. Add to those bodies the mistaken hits that get made. - the information*
- DO NOT** operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the:
 - Door (bent)
 - Hinges and latches (broken or loosened)
 - Door seals and sealing surfaces.
- The oven should not be adjusted or repaired by anyone except properly qualified service personnel.

*can't what it used to be, obviously - and the poor
doles who have to get put out to pasture because they saw a blatdown of*

IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, basic safety precautions should be followed, including the following:

WARNING- To reduce the risk of burns, electric shock, fire, injury to persons or exposure to excessive microwave energy:

- Read all instructions before using the appliance. *Deal or just about anything they weren't supposed to see. And we're talking*
- Read and follow the specific "precautions to avoid possible exposure to excessive microwave energy" above. *serious body counts.*
- The oven must be placed on a countertop which is a minimum of 920mm (36 inches) from the floor. For correct operation, the oven must have sufficient air flow. Allow 7.8" of space above the oven, 4" at back and 2" at both sides. Do not cover or block any openings on the appliance. Do not remove feet. *Don't it make you wonder sometimes, is there still a Poland or an Italy? Should we make a trip across the pond and start shit with the locals there, just like old times, but this time in reverse.*
- This appliance must be grounded. Connected only to properly grounded outlet. See "grounding instructions" on page 3. *We'd probably best start*
- Some products such as whole eggs and sealed containers, for example, closed glass jars may explode and should not be heated in this oven. *with the*
- Use this appliance only for its intended use as described in this manual. Do not use corrosive chemicals or vapors in this appliance. This type of oven is specifically designed to heat, cook or dry food. It is not designed for industrial or laboratory use. *Really, this whole goddamn resurgence thing is over. I'm passing that buck up. Well, the bosses, yeah, you'd better believe about blaming me for some fuckup.)*
- As with any appliance, close supervision is necessary when used by children.
- To reduce the risk of fire in the oven cavity:
 - Do not overcook food. Carefully attend appliance if paper, plastic or other combustible materials are placed inside the oven to facilitate cooking.
 - Remove wire twist-ties from paper or plastic bags before placing bag in oven.
 - If materials inside the oven should ignite, keep oven door closed, turn oven off, and disconnect the power cord or shut off power at the fuse or circuit breaker panel.
 - Do not use the cavity for storage purposes. Do not leave paper products, cooking utensils or food in the cavity when not in use.
 - Microwave heating of beverages can result in delayed eruptive boiling, therefore care has to be taken when handling the container.
 - Do not deep fry food in the microwave. It is difficult to control the fat which could cause a fire hazard.
 - Pierce foods with heavy skins such as potatoes, whole squash, apples and chestnuts before cooking.
 - The microwave heating of feeding bottles and baby jar foods should be stirred or shaken and the temperature should be checked before serving in order to avoid burns.

CONTINUES ON PAGE 3

*own fucking fault. I'm passing that buck up. (And one of them who'd think twice about blaming me for some fuckup.)
With so many of the above mentioned shopkeepers, all the outright violence and general M-I will towards the syndicates - can you blame them?*

Can you blame for the pma to charge just to get letters from A to B? —
It's no surprise these sad fucks finally started saying: Enough B Enough

IMPORTANT SAFETY INSTRUCTIONS

13. Cooking utensils may become hot because of heat transferred from the heated food. Potholders may be needed to handle the utensil.
14. Do not cover or block any openings on the appliance.
15. Do not store or use this appliance outdoors. Do not use this product near water, for example, near a kitchen sink, in a wet basement, or near a swimming pool, and the like.
16. Do not operate this appliance if it has a damaged cord or a plug, if it is not working properly or if it has been damaged or dropped.
17. Do not immerse cord or plug in water. Keep cord away from heated surface. Do not let cord hang over edge of table or counter.
18. Use only thermometers which are specifically designed for use in microwave ovens.
19. Do not operate any heating or cooking appliance beneath this appliance.
20. Be certain the glass tray and roller ring are in place when you operate the oven.
21. WARNING: It is hazardous for anyone other than a trained person to carry out any service or repair operation which involves the removal of any cover which gives protection against exposure to microwave energy.

Anyway, it sounded like they're pretty serious about changing things. First off, they're talking about deals with these new farming groups. Shut like normalizing the pages and running them under some kind of semi-official semi-commercial arrangement. Taking almost all the "profit-motive"

GROUNDING INSTRUCTIONS

Yeah, what little is there, right? — out of this guy. They just don't realize

This appliance must be grounded. In the event of an electrical short circuit, grounding the risks we reduces risk of electric shock by providing an escape wire for the electric current. take day on day out.

WARNING: Improper use of the grounding plug can result in a risk of electric shock.

Electrical Requirements

The electrical requirements are a 120 volt 60 Hz, AC only, 20 amp. It is recommended that a separate circuit serving only the oven be provided. The oven is equipped with a 3-prong grounding plug. It must be plugged into a wall receptacle that is properly installed and grounded.

A short power-supply cord is provided to reduce risk of becoming entangled in or tripping over a long cord. I think it's really a cover story the bosses are pushing

Extension Cord: Do not use any extension cord to run this appliance.

Notes: 1. If you have any questions about the grounding or electrical instructions, consult a qualified electrician or service person. They might actually put some structure into

Notes: 2. Neither Danby nor the dealer can accept any liability for damage to the oven or personal injury resulting from failure to observe proper electrical connection procedures. this operation to

Radio or TV Interference get on the good side of the Law, but

Should there be any interference caused by the microwave oven to your radio or TV, check that the microwave oven is on a different circuit, relocate the radio or TV as far away from the oven as possible or check position and signal of receiving antenna. they'll keep their margins on

their services as long as they can get away with. If bosses are good at one thing, it's obscuring their profits. Even I don't know how much our syndicate clears per parcel delivered. I know

roughly the average of how much it costs, but the profit remains a mystery — and I'll bet that's just how they want it.

There has also been talk of the more profitable side of things pulling to some government banner. Can't begin to tell you how that might play out. I think it's just talk to leak to the farmers, to try and get them against the side of law and order. Legitimizing the products 3 farmed by syndicate operations

would have a big negative effect on a lot of these farms, and I mean a lot. Hell, you should see half the countryside here in late spring.

UTENSILS GUIDE

It looks like blankets of red draped over everything.

1. The ideal material for a microwave utensil is transparent to microwaves, it should allow energy to pass through the container and heat the food. I expect they grow Ophion not just in Nebraska but in Kansas too, yeah? Ever get sleepy making
 2. Microwaves cannot penetrate metal, so metal utensils or dishes with metallic trim should not be used. a run on the yellow brick road?
 3. Do not use recycled paper products when microwave cooking, as they may contain small metal fragments which may cause sparks and/or fires. Popcorn!
 4. A round dish is preferable to oval or rectangular dishes, because food cooked in corners allows more exposure to microwaves. Over cooking at corners may occur. Ha - sorry - too obvious a shot not to make. You still remember that Movie? Seems like Brevor since movies are all that stuff. Well, anyway, I may be reading too far into this as to why and how word of this is getting round so much.
- The list below is a general guide to help you select the correct utensils.

Cookware	Microwave Cooking
Heat-Resistant Glass	Yes
Non Heat-Resistant Glass	No
Heat-Resistant Ceramics	Yes
Microwave-Safe Plastic Dish	Yes
Kitchen Paper	Yes
Metal Tray	No
Metal Rack	No
Aluminum Foil & Foil Containers	Yes

this is all relevant to but not really what I'm writing to you about. What these wanks don't understand - and that (oddly enough) these redneck cornshuckers, hog-callers, the settlers of old and other assorted

MICROWAVE COOKING PRINCIPLES

ubes DO get - is that there really is no "legit" anymore except for

The speed and evenness of microwave cooking is affected by the foods themselves. Microwaves penetrate foods to a depth of 1.8 to 3.8 cm (3/4 to 1 1/2 inches) on all surfaces. The interior of foods greater than 5 cm (2 inches) in diameter heats by conduction. Food with high water, fat or sugar content respond quickly to microwave energy. occasional deliverance of fatal violence

Quantity. Microwave cooking times are directly related to the amount of food in the oven because energy is absorbed by the food itself.

Size. Small pieces cook faster than large ones. To speed cooking, cut pieces smaller than 5 cm (2 inches), so microwave can penetrate to the center from all sides. For even cooking, make all the pieces the same size.

Shape. Foods irregular in shape, like fish or chicken breasts, take longer to cook in the thicker parts. To help them cook evenly, place the thickest parts to the outside of the dish, where they will receive more energy.

Starting temperature. Frozen or refrigerated food takes longer to heat than food at room temperature.

Moisture Content. Microwaves are attracted by moisture. Naturally moist foods microwave better than dry ones. Add a minimum of liquid to moist foods, as excess water slows cooking. Prick foods with skins like those on potatoes or squash, so internal steam can escape. that doesn't gain anyone anything.

Fat and Bone. Marbling within meat, or a thin even layer of fat on a roast, speeds cooking. Large fatty areas or excess drippings in dish attract energy away from meat to slow cooking. Center bones do not affect cooking, but bone on the side of meat conducts heat to the areas next to it.

Density. The depth to which microwaves penetrate foods varies depending on their density. Porous foods, like ground beef or mashed potatoes, microwave faster than dense ones like steak or whole potatoes.

But listen: no gold standard, ISO,

no fucking metric system (except for our bikes) no nothing but fists

Impossible to tell who we have to thank (or curse) for that, but the fact is that it's the way things are. Maybe it was still the way when we had internet and UN and all that shit, just observed enough that no one really thought about it.

Can Sorry, I've been ranting. Been smoking a bit much this evening.
Anyway, here's the deal: It's me and three other guys: Monty, Hal,

SPECIFICATIONS

and Sean. You know Monty and Hal. They were a couple years ahead of us at Haskell.

Power Consumption:	120V 60Hz, 1450W	crazy knobs
Output:	1000W	Not that bright, but yeah,
Operation Frequency:	50MHz	
Outside Dimensions:	12"(H)X20 11/16"(W)X16 5/16"(D) or 305mm(H)X525mm(W)X415mm(D)	just crazy
Oven Cavity Dimensions:	8-5/8"(H)X13 3/4"(W)X14"(D) or 219mm(H)X350mm(W)X355mm(D)	pretty much
Oven Capacity:	1.0 cu.ft.	
Cooking Uniformity:	Turntable System (12 3/8" / 314mm)	
Net Weight:	Approx. 39.4lbs. / 17.9kg	

Sean's of Irish descent but he's still a good guy. Originally from Northern Cal. Former. He's the idea guy.

Here's his idea: we ride out west out of St. Louis, pick you up in Lawrence and keep on towards the coast, working odd jobs, piffing if necessary. Once we get to Colorado we turn North to

BEFORE YOU CALL FOR SERVICE

Denver and Colorado Springs, and go through Fort Collins. Keep on North to Cheyenne. Maybe score a few horses - beats pushing yourself, yeah? - then turn West again and ride all the way to Salt Lake City.

If the oven fails to operate:

- Check to ensure that the oven is plugged in securely. If it is not, remove the plug from the outlet, wait 10 seconds and plug it in again securely.
- Check to ensure that the door is securely closed engaging the door safety lock system. Otherwise, the microwave energy will not flow into the oven.
- Check for a blown circuit fuse or a tripped main circuit breaker. If these seem to be operating properly, test the outlet with another appliance.

IF NONE OF THE ABOVE RECTIFY THE SITUATION, THEN CONTACT A QUALIFIED TECHNICIAN. DO NOT TRY TO ADJUST OR REPAIR THE OVEN YOURSELF.

Pick up supplies along the way and turn Northwest. Head up through Idaho to Pocatello and then Boise. Sean says there's hot springs somewhere in Idaho that we could rest our sore asses in.

PART NAMES

What the hell ever, I say, just give me some dope. After a few days or however long we feel like staying in Boise (why move then? I don't know, maybe there's some willing chicks there?)

- ① Door Safety Lock System
- ② Oven Window
- ③ Microwave outlet cover
- ④ Turntable-Shaft
- ⑤ Roller Ring
- ⑥ Glass Tray
- ⑦ Control Panel
- ⑧ Door Release Button

we head West again, straight through the middle of Oregon. Stop for a bender in Bend, then onto Eugene. Sean says Eugene is a soft little town near the coast, and some of Monty's

CONTROL PANEL

DISPLAY

When set, displays clock/timer, shows cooking function(COOK, DEFROST, etc.) and step-by-step word prompts(which tell you which pad to touch) for easy oven setting.

BAKED POTATOES

Automatic program designed for best microwaving potatoes. For small potatoes (4-6 oz.) touch once, touch AMOUNT (1 to 4) then START. For large potatoes(8-10 oz.) tap pad twice, touch AMOUNT (1 to 4) then START.

POPCORN PAD

Automatic one-step setting for a 1/2- 3 oz. bag of microwave popcorn. Touch POPCORN pad, then START. See pages on "POPCORN" to reset control for packages of different ounce weight.

PIZZA PAD

Automatic program designed for pizza. Touch once then touch START for reheating 1 slice; tap pad twice, then START for frozen whole microwave pizza.

BEVERAGE PAD

Automatic setting for cups or mugs of hot beverages (tea/coffee). For cup size (5-7 oz.), touch pad once, touch AMOUNT(1-4) then START. For larger mugs (8-11oz.), tap pad twice, touch AMOUNT (1-4) then START.

REHEAT PAD

Automatically programs oven to heat a plate of food evenly. Touch REHEAT pad then START.

(Also see following pages for more detail.)

FROZEN DINNER PAD

Automatic program designed for best reconstituting a variety of frozen single-serving entrees and dinners. For smaller single serving entree(7-9 oz.) touch once, touch AMOUNT then START. For a single larger(TV dinner type) frozen dinner(10-12 oz.) tap pad twice then START.

NUMBER PADS

Touch to set cook, speed defrost, timer and clock.

people (Coquille) live near there, like right on the coast.
Perfect for hanging ~~our~~ hats, raising a little bud, fishing
for salmon. And if not, hell, we can always go North or
South from there. — Oh, say you'll join us. It'll be
so fucking fun, just like our Haskell days — except
with a little more drug abuse and maybe ~~some~~ violence.
Hee-hee-hee — If you don't, don't take our reaction
personal, OK?

See you soon, buddy.

— Red Bill

Three-spoke Monty, Hal B,
and Sean Mac
